2. Say you have two tables named as 'vote' and 'candidate' as below:

VOTER_ID	CANDIDATE_ID
1	2
2	4
3	3
4	2
5	5

CANDIDATE_ID	NAME
1	A
2	B
3	C
4	D
5	E

Write a SQL to find the name of the winning candidate, the above example will return the winner 'B'.
